To whom it may concern:

Clearwater Specialty Chemical Company has purchased three Yamada air diaphragm pumps in the last couple of years. We currently have two, two inch pumps and one, inch and a half pump.

These pumps are able to handle the wide variety of chemicals that we use. These products have a wide range of densities and viscosities and can also have a wide range of temperatures due to the climate we have here in Canada. We have had few diaphragm problems pumping cold fluids in the winter months.

We have had no mechanical problems with these pumps since we purchased our first two inch pump two years ago. We use these pumps every day for our business, and will continue to use these pumps into the future. We have found that the Yamada air diaphragm pumps have been very reliable and require few repairs and little extra attention. They have worked well for our product mix.

If you have any questions, please feel free to contact me at (403) 342-4280.

A handwritten signature in black ink, appearing to read "Jeff Justik". The signature is fluid and cursive, written over a light background.
