

Yamada Air Operated Double Diaphragm Pumps

The Yamada Corporation has been a leading producer of fluid handling equipment for 60 years. As a pioneer of pumping technology, Yamada is known in many industries worldwide for its innovative products, superior quality and unmatched reliability.

The Yamada air operated double diaphragm pumps consist of a patented non-stalling, non-lubricated unified air valve design. The Yamada AODD is inherently self priming, portable, easy to install and use positive displacement pump with an extremely broad range of product materials that make this pump a true problem solver for many uses. The Yamada pump is suitable for use and carries full manufacturer warranty when using clean compressed gases as the driving medium, including Natural Gas.

The Yamada product carries full ATEX certification for use with Natural Gas. The broad range of uses for these pumps provides innovative solutions to support the fluid handling requirements of all sectors of industry.

Take advantage of the risk free **Yamada free trial pump program**.
